

## VITREOUS ENAMELLING COURSE

Welcome to Sasha Leon Sculpture & Jewellery and thank you for choosing my vitreous enamelling jewellery course covering the techniques employed to apply enamelling glass powder onto metal, semi-precious or precious metal surfaces.

I am a qualified goldsmith with over 33 years of experience and have a BA (Fine Art) from UCT. I taught enamelling for 22 years in the jewellery department at the Cape University of Technology. Enamelling has always been my chosen field of interest within the jewellery making discipline

The cost of the enamelling course comprising four lessons of three hours each is R2,200.00

- all materials, excluding sterling silver, will be provided including enamel powders and base copper blanks
- no prior experience is needed
- all required tools and facilities, such as a kiln, will be available for use during the lessons
- personalised and individual attention, guidance and encouragement are provided

The course is broken down as follows:

1. The first two lessons will introduce the student to the technique of applying powdered enamel onto a copper surface.

2. The lessons will teach the student how to SIFT and the how to STENCIL different designs onto the copper plate. These techniques are basic and produce wonderful and colourful results.
3. The second two lessons will introduce the student to CLOISONNÉ. This uses translucent enamel powders and fine silver wires that separate the enamel colours. This technique is effective and allows the enamelling technique to truly extend itself.

The following are names of some well know vitreous enamelling artists, if you would like some inspiration. Please Google their names!

- Ruth Ball.
- William Harper.
- Debbie Sheezel.
- Caroline del Zoppo.
- Fred Rich
- Phil Barnes

Please feel free to contact me directly on 082 824 3549 if you have any queries.

I look forward to meeting and teaching you!

Thanks
